Uniper Trainee Program – IT (f/m/d)

What we offer
Throughout the course of the 18 / 24-month program based in Germany you will experience new challenges, exciting opportunities and the chance to network internationally. The program will give you an in-depth insight into our business and help you to explore and further develop your expertise. Individual mentoring and a buddy from day one will give you the best possible foundation for the next step in your career at Uniper!

What you can expect
As a Uniper trainee in our IT department, you will be part of an international, multidisciplinary team that drives the technology of this company. Depending on the placements you choose, your tasks will vary from holistic IT strategy projects to defending our company against cybercrime to designing dashboards using big data analytics tools, to working towards further digitizing our business. You will have an opportunity to work across the different lines of businesses from power plants to trading floors. By leveraging your creativity and problem solving techniques, you will have the chance to work in really interesting projects. But don’t worry, we are here to help you match your skills and interests to the opportunities.

Who we are seeking
The utility sector is where mission critical IT faces the rapid pace at which technology is advancing nowadays. That is why we are modernizing our IT at an ever greater speed. Every day, we are seeking new ideas, thoughts on how to improve our businesses, how to generate new business models, and most importantly, how IT can design, deliver and drive these ideas. We are looking for young talents who can think out of the box, are passionate about technology, have an understanding of data engineering, and are fearless to come up with new ideas and challenge our approaches! Be assured that your opinion matters, and we will take care that you make the most out of this traineeship and learn a lot personally and professionally. From Digitalizing our assets to Decarbonizing our fleets, we have a lot of cool topics in our portfolio. If you think you can take this challenge, then what’s stopping you?!
